

## Geography

State Standard Number	State Standard Area/Description	Unit Name	Course Topic Description
G	Geography		
G.1	Use different types of maps and geographic tools to analyze features on Earth to investigate and solve geographic questions		
G.1.a	Gather data, make inferences and draw conclusions from maps and other visual representations	Introduction to Geography	Locating Our Place in Space
G.1.b	Create and interpret various graphs, tables, charts, and thematic maps	Introduction to Geography	Locating Our Place in Space
G.1.c	Analyze and present information using a variety of geographic tools and geographic findings in graphs, tables, charts, and thematic maps	Introduction to Geography	Locating Our Place in Space
G.1.d	Locate physical and human features and evaluate their implications for society	Introduction to Geography	Physical Attributes of Earth's Landscape
G.2	Explain and interpret geographic variables that influence the interactions of people, places and environments		
G.2.a	Apply geography skills to help investigate issues and justify possible resolutions involving people, places, and environments. Topics to include but not limited to how people prepare for and respond to natural hazards	Southeast Asia and the Pacific	Physical Systems and Processes of Southeast Asia and the Pacific
G.2.b	Identify, evaluate, and communicate strategies to respond to constraints placed on human systems by the physical environment	Southeast Asia and the Pacific	Physical Systems and Processes of Southeast Asia and the Pacific
G.2.c	Explain how altering the environment has brought prosperity to some places and created environmental dilemmas for others	Introduction to Geography	Human Impact

## Geography

G.2.d	Research and interpret multiple viewpoints on issues that shaped the current policies and programs for resource use	South America	Focus on Deforestation
G.2.e	Explain how information and changing perceptions and values of places and environment influence personal actions	South America	Focus on Deforestation
G.2.f	Define sustainability and explain how an individual's actions may influence sustainability	Central America	Human Impact on the Central American Environment
G.3	The interconnected nature of the world, its people and places		
G.3.a	Explain how the uneven distribution of resources in the world can lead to conflict, competition, or cooperation among nations, regions, and cultural groups	Africa	Human Impact on the Environment of Africa
G.3.b	Explain that the world's population is increasingly connected to and dependent upon other people for both human and natural resources	North America	Physical Characteristics and Systems of North America
G.3.c	Explain how migration of people and movement of goods and ideas can enrich cultures, but also create tensions	North America	Human Culture of North America

## Geography

G.3.d	Analyze how cooperation and conflict influence the division and control of Earth	Eastern Europe	Where Is Eastern Europe?
G.3.e	Analyze patterns of distribution and arrangements of settlements and the processes of the diffusion of human activities	Introduction to Geography	Human Impact
G.3.f	Make predictions and draw conclusions about the global impact of cultural diffusion	Introduction to Geography	Human Impact
